

Secure Cloud for Azure

Extend your network, identity and security boundaries directly into Azure.

Embrace cloud with confidence and all of the freedom to build and deploy. Consume services as though they were on-premises in your own data centre. Meet the security and assurance requirements placed on government.

What is Secure Cloud for Azure?

Secure Cloud allows you to get the most out of hyperscale cloud computing by securely extending your network, identity and security boundaries directly into Azure. Confidently deploy solutions knowing that trusted controls, processes and automation are in place to encapsulate and protect your presence in the cloud, silently maintaining the security and integrity of your systems and data.

Why customers use Secure Cloud

- PROTECTED-ready solution designed explicitly to build on the certification of Azure’s Australian-based regions.
- The quickest and simplest way for a customer to securely consume Azure as an extension of their environment.
- Accelerate digital transformation without the concerns and with all of the confidence to build and deploy.

On-boarding, streamlined

We’ve done the work for you

Fast track cloud adoption with a defined set of processes and standards – a cloud framework – and security certification documentation tailored to your deployment.

Cloud presence, secured

Building on Microsoft’s trusted cloud

Aimed at government and regulated industry, Secure Cloud is designed to be PROTECTED-ready and meet government security and assurance needs in accordance with ASD’s ISM.

Innovation, assured

Do what your business does best

Secure Cloud silently maintains the security and integrity of your systems and data so you can get on with realising all of the potential that’s only available in Microsoft’s hyperscale cloud.

Scalable and affordable for every business

Constantly monitored, maintained and matured

Thousands of hours of development

Secure Cloud is a culmination of thousands of hours of development, bringing together the best technologies and services available from Azure, the brightest technical minds and years of relevant industry experience, so that you can get back to focusing on what your business does best.
